BOSTON MILK PRICES LOWEST IN YEARS

Butter Prices Reach Lowest Point Since 1906

Maine dairymen who ship to Boston will receive the lowest price on record for their January milk, according to information furnished by the New England Milk Producers' Association. The reason for this low price is an excess of milk when butter prices are the lowest they have been since 1906, and the competition which has developed in the market among the various agencies selling milk there.

The primary cause of the slump in prices, according to the Association, is the low butter market. During the first 10 days of January the butter price averaged less than 29 cents a pound. At that price milk which is made into butter is worth \$1.00 a hundredweight or less than 24 cents a quart. If the milk is sold as cream it would be worth about \$1.28 a hundredweight or about 24 cents a quart.

While comparatively little butter is made in New England, the price of butter made in the west has an indirect effect on milk prices in New England. The value of western cream is only a little more than what it would bring if made into butter, less than 24 cents per hundredweight of milk. Western cream comes in competition with New England cream and the price at which New England farmers can sell cream is only a little, if any, more than what western cream brings when delivered in Eastern markets.

Under these conditions any excess milk above what is needed for resale brings a price based on western butter values. In January this will be about \$1.25 a hundredweight, or 24 cents a quart. The market milk price for January is seven cents a quart delivered at Boston or \$2.40 at shipping stations in Maine. It is estimated that 50% of all milk will be sold as fluid milk and will bring \$2.43. The remaining 20% will be sold as surplus and will bring about \$1.25 a hundredweight. The resulting net price for all milk will be about \$1.82 per hundred or four cents a quart. There is no record of so low a January price since the Association started in 1917.

Gould Academy Notes

The annual election of officers for the Y. M. C. A. resulted as follows:

President—George Anderson
Vice President—Donald Hamlin
Secretary—Summer Hanson
Treasurer—Philip Carter
Executive Board—Warren Bean

Committee for the Winter Carnival to be held in February will be announced soon.

The seniors have selected for their class play the three-act comedy, "The Nut Family," by John C. Brownell. Parts have been assigned and rehearsals are in progress. The cast:

Mrs. Barton, Mary Thurston
Willie Barton, Grosvenor Fish
Robert Bent, Daniel Wright
Ezra Silscomb, Melvin Martinson
Helen Bent, Adelia Hanson
Agatha Silscomb, Barbara Herrick
J. Clarence Biddeford, Norman Moore
Harold Van Horton, Franklin Chapman
Mabel Herrick, Hilda

The second game in the series of girls' inter-class basketball was played Thursday afternoon when the sophomores defeated the juniors by a margin of three points. The game was interesting from start to finish resulting in a score of 23-25. Evelyn Thurston was high scorer for the sophomores and Ethel Keene for the juniors.

The freshman girls made their basketball debut on Monday when they played the sophomores. The freshmen forced the sophomores to work hard till the whistle blew, the final score being 25-23 in favor of the sophomores. Evelyn Thurston was high scorer for the sophomores and Barbara Davey for the freshmen.

What class will win the champion ship? Time will tell.

BETHEL SCHOOL BANK REPORT

January 26, 1931.			
Primary School			
Grade	Savings Bank	Total	Per Cent
I	\$1.00	\$1.54	15
II	1.00	.91	9
III	2.00	1.62	32
IV	1.00	1.71	21
	\$5.00	\$4.88	
Grammar School	\$2.00	\$3.83	31
V	2.00	.53	31

VIII	1.00	.45	20
	\$6.00	\$4.83	

Word has been received from Mrs. Ruth M. Glavin, who entered the Massachusetts Women's Hospital last September for training that she passed all subjects and has been accepted. Her work was very difficult, as only two out of a class of thirteen received their caps.

NEW ENGLAND MILK PRODUCTION 5% ABOVE AVERAGE

BUTTER PRICES REACH LOWEST POINT SINCE 1906

Average daily milk production per cow for all cows, as reported by many at the rate of ten thousand a day at

New England dairymen, on January 1, the National Soldiers' Home, Maine.

1931, was 2% lower than on January 1, 1931, but 5% above the five year average for that date. Milk produc-

tion per cow is lower than a year ago

in all of the New England States except New Hampshire which shows a slight increase over last year. As com-

pared with the average for Decem-

ber 1, 1930, milk production per cow

is 5% higher than in 1930.

Tea to be blossoms are not grow-

ing through the snow but are being

fashioned by the busy, patient, some-

times clumsy fingers of disabled veterans of the World War in the Poppy

Work Shop under the management of

the Legion Auxiliary of Maine in co-

operation with Colonel Keith Ryan,

1930, milk production per cow

is 5% higher than in 1930.

P. H. Hershey detailed for special du-

ties by the Auxiliary supervisor. This

is the third consecutive year of Maine's

1 to January 1. The average produc-

tion for New England on January 1,

thirty thousand poppies are being made

at the Poppy Work Shop. One hundred

and twenty-four hours a day at the

Poppy Work Shop, Mrs. Anne F. Snow of

Rockland, Maine Poppy Chairman, is

Eastern Divisional Chairman of the

National Poppy Committee, which in-

cludes general supervision of the Pop-

py Project for the Legion and Auxili-

ary in the New England States and

New York, New Jersey, Pennsylvania,

MAINE LANDOWNERS URGE EMBARGO

Russian Convict Labor A Menace

to Maine Industry

Telegram was sent this week to the Maine delegation in Congress, asking them to secure, under regulations issued by the Treasury Department last November, prompt publications by that Department of findings that convict labor is extensively used in the manufacture of pulpwood in Russia and that shipments thereof are thereby prohibited entry into the United States.

The telegram also requested the Maine delegation to urge the Ways and Means Committee to take immediate and favorable action on the Kendall bill which prohibits imports into the United States of forced labor products.

This action on behalf of the land owners and farmers was supplemental to a letter addressed to the United States Commissioner of Customs by a group of land owners.

Representative John E. Nelson was the first to respond, wiring to Clarence C. Stetson that he had appeared before the Ways and Means Committee at its hearing on the Kendall bill and spoken on behalf of the land owners and farmers for an embargo on Russian pulp wood.

Many trades and professions are represented among the World War men who are making red paper Poppy Poppies for the Poppy Work Shop being conducted for the third consecutive year at the National Soldiers' Home.

Naccomi Temple, Pythian Sisters, held their regular meeting Monday night, followed by installation of officers, with Mrs. Carrie French serving as installing officer, assisted by the grand manager, Mrs. Ava Austin, and the grand senior, Mrs. Minnie Bennett. Refreshments were served after installation.

The following officers were installed: Past Chief—Mrs. Florice McInnis; Most Excellent Chief—Mrs. Lena Chapman; Excellent Senior—Mrs. Beatrice Andrews; Excellent Junior—Miss Faye Mitchell.

Manager—Mrs. Olive Head; Mistress of Records and Correspondence—Mrs. Jennie Mitchell; Mistress of Finance—Mrs. Mildred L. Wells; Protector—Mrs. Vera McDenis; Guide—Mrs. Helen Perry.

BELIEVE IT OR NOT

If all the slaves in the South had been bought at \$1,000 each, it would cost less than the Civil War.

The Island of Cuba is long enough to reach from New York to Chicago.

Six hundred thousand more Bibles were sold in 1926 than in any previous year.

There were about 20,000 pages in the service of the United States Army during the World War and only about 10,000 were lost in action.

MERRILL-GIROUX

Gordon Merrill, younger son of Mr. and Mrs. Clifford Merrill, and Miss Flora Giroux, daughter of Mr. and Mrs. Edward Giroux of Rumford, were married Friday night by H. H. Hastings, Justice of the Peace, at his home.

Mr. and Mrs. Merrill are members of the service in the First World War and during the war were in France.

Mr. and Mrs. Merrill are now in Rumford.

Miss Flora Giroux is the daughter of Mr. and Mrs. Edward Giroux of Rumford.

The bride is the daughter of Mr. and Mrs. Edward Giroux of Rumford.

The bride is the daughter of Mr. and Mrs. Edward Giroux of Rumford.

CAN I Learn to Fly? — By WILLIAM R. NELSON

Eights and Spot Landings

UNCLE SAM'S Department of Commerce believes that persons seeking pilot's licenses should be able to do certain things with the machine they desire permission to operate. To ascertain the applicant's ability to meet the several requirements of each class of license, a test flight is given. For the private pilot's license, that test includes "figure eights," "spiral glides," "take-offs," and "spot landings."

As I had had everything but the figure eights, spiral glides and spot landings, my instructor was back with me again the next lesson to show me the eights and spot landings.

"We'll use those two trees—they are a quarter of a mile apart—as pylons," my instructor said, pointing them out. "Make your first turn into the wind and try to hold your bank until one end of the figure eight is made. Then level out, fly to the other pylon and reverse the turn."

It sounded easy, but holding that turn around the tree was difficult. A half dozen trips around the figure eight course, however, polished me up sufficiently for the next step.

"Now we'll use those two trees," he pointed out two much closer together. "You will have to bank almost vertically."

The "eight-eights" were easier for me. Satisfied with my grasp of the maneuver, he signaled for a return to the field.

As we flew to the landing he spoke again.

"See that big tree down there? Put down on a line with it. Cut the motor whenever you think is right. Don't gun the motor except to clear it."

Estimating our distance away and up, I cut the motor to idling and started the glide in. Forbiddon, to gun the motor, he signaled for a return to the field.

As we flew to the landing he spoke again.

"See that big tree down there? Put down on a line with it. Cut the motor whenever you think is right. Don't gun the motor except to clear it."

Estimating our distance away and up, I cut the motor to idling and started the glide in. Forbiddon, to gun the motor, he signaled for a return to the field.

"There is no trick to spot landings," my instructor explained. "It is merely a matter of practice. I'll take you around once, then you do it. From now on make all of your landings spot. That is the only way to learn to do it by constant practice."

He took the controls and we roared around the pattern again. I made mental notes of landmarks for each thing he did, but was forced to disregard them. He overshot the spot line. Disgusted, he flew around again and that time put down perfectly over the line.

Mr. Curtis' Gloritone Radio

Men took to the East for the dawning things, for the light of the rising sun, But they look to the West, to the crimes West, for the things that are done, are done. The cowboy boy is a new-made hero from the dark of the night destined.

But the westward sun is a sunset sun is the sun of a hope fulfilled!

Douglas Mallock.

**The Boyhood
of Famous
Americans**

By
J. V.
Fitzgerald,

Chief Justice Chas. E. Hughes
Kindergarten certainly wasn't any place, even for a boy of five, when the lad was able to outline a plan of study for the classics to his father, Rev. David Hughes, Baptist minister in Oswego, N. Y., made up his mind to that effect when his son, Charles, presented such a plan to him shortly after he had been enrolled in the infant class.

The result was that the boy was taken out of school and tutored by his mother and father. Mrs. Hughes had been a school teacher before her marriage. Few parents were so well equipped to teach a bright lad at home.

Charles Evans Hughes was a precocious child, as his formulation of a plan to study the classics when he was in kindergarten well bear out. He was born in 1862 in Glens Falls, N. Y., where his father had a small congregation. He was delicate as a child and didn't romp and play much with other little boys and girls.

Perhaps because he was not particularly robust his parents devoted more time to him than might ordinarily have been the case. His mind developed rapidly. He showed a decided interest in books as soon as he was able to talk. He was reading nursery rhymes when he was three and a half years old. He was five when his father was transferred to a church in Oswego where Charles was summarily removed from kindergarten.

When he was eight, and the family was living in Newark, N. J., the lad was able to translate the Bible from the Greek. He was also a wide reader of Shakespeare's works at this early age.

He later went to school in New York city where he was graduated from high school in 1875 at the age of thirteen as salutatorian of his class. His oration, because of its scholarly tone and the fine delivery of the orator, surprised a big crowd that attended the exercises in the old Academy of Music in that city.

While attending high school he wrote essays on such subjects as "The Limitation of the Human Mind," "Self Help," and "The Evils of Light Literature." He was indeed even then a deep student and thinker.

The Rev. Mr. Hughes wanted his son to become a clergyman, if the boy felt a real call to the religious life. Young Charles had not made up his mind definitely as to his future career when he entered Colgate at the age of fourteen. He was a slight boy at the time and timid, save when it came to questions of scholarship. Then he would talk well and enthusiastically, even with his elders. Mentally he was more mature than his classmates.

The boy spent two years at Colgate. From there he went to Brown university, entering as a sophomore in 1878. He immediately showed all the promise indicated in his high school days. He was a brilliant student, but modest and retiring in disposition.

He gained many scholastic honors at Brown. He won the prize for the highest standing in English literature when he was a junior. Upon graduation, at the age of nineteen, he was awarded the prize as the student showing the most all-around promise. He was honor man in his class.

By this time he had finally made up his mind not to become a clergyman. Deciding against following the career for which his father had hoped, he went from Brown university to DePauw, N. Y. There he taught mathematics in the Delaware academy.

He studied law at Columbia university at night, after returning to New York city and was admitted to the bar when he was twenty-two years old.

While the young lawyer had been sickly as a child he showed great physical capacity for work in the next three years. He was engaged as a clerk in a law office during the day. At night he acted as a teacher and tutor at Cornell university.

Finally his health suffered under the strain. He was ordered to take a vacation. He spent it as a teacher of commercial and contract law at Cornell university.

The upstate climate agreed with him. When he returned to New York City he was able to throw himself squarely into the duties of his profession as a practitioner. He first attracted wide public attention in connection with the gas investigation committee. He added to his reputation as an outstanding lawyer by his conduct of the insurance investigation, another New York state inquiry.

Later he was elected governor of New York and re-elected, resigning to become a United States Supreme Court Justice. He retired from the bench to be his party's candidate for the Presidency. He lost the highest office within the gift of the American people because of a factional split in California. Later he served as Secretary of State and is now chief Justice of the United States Supreme Court.

The Song of the Reaper

BY A. J. DUNLAP

*The greasy old reaper was rusty
And stood in the tumbled-down shed,
Through most of the year it was silent—
A thing without purpose, and dead.
But harvest-time waked the old reaper,
When summer winds laughed through the grain;
Then day after day as it labored
The old reaper sang this refrain:
'I'm only a battered old reaper,
Tarnished and covered with rust,
And I toil in the wheel fields of summer,
Through the shimmering heat and the dust;
I love to be out in the open free
My spirit in action set free
As I gather the golden-ripe harvest
God's gift to humanity.'*

THE OLD FARM SERIES

NORTH PARIS

The Women's Division of the Farm Bureau will hold its first meeting of the year Thursday, Jan. 21, at Community Hall. The meeting will be in charge of Mrs. F. A. Littlehale, with "Main Dishes and Leftovers," as the project.

Mrs. S. E. Coffin will act as dinner committee, with Mrs. F. A. Littlehale. All are cordially invited.

Owing to the weather there was only a small attendance to the oyster supper and social Thursday evening. Alfred Andrews and William Littlehale were the committee. Those attending pronounced the supper of extra quality.

Schools reopened Monday after a week vacation. The teachers, Misses Dean and Beede, are boarding with Mrs. D. H. Perkins.

Those attending the Federated Church are enjoying music by a mixed quartet at their Sunday services. Those singing in the quartet are S. L. Wheeler, Floyd Hart, Howard Hart, Mrs. Nelson Cole, Mrs. Charles Bidley, and Lois Childs, with Esther Whittier at the organ.

Miss Marion Perkins leaves Friday, Jan. 30, for Hartford, Conn., where she will enter the Hartford General Hospital to train for a nurse. On her way she will stop with friends in Portland, one night with her cousin, Margaret Perkins in Boston, and over the weekend with her brother, Frederick Perkins, and wife in Hartford, continuing in her course, Feb. 3.

Aton Hadley is visiting his daughter in Vermont.

Leon Comant returned to his work in the shoe shop at Norway Monday, having been laid off several months for lack of orders.

Mrs. S. E. Coffin, Clarence Coffin, and Mrs. Martha Martin were in Auburn Sunday. On their way home they called on Mr. and Mrs. W. O. Richardson at Mackett's Mills.

Mrs. Nina Felt of Norway called on her daughter, Mrs. Florence Pierce, Saturday.

Mrs. Gordon Abbott is visiting her parents at Vanceboro. Mr. and Mrs. Abbott will soon return to Lebanon, Conn., where he has employment.

EAST BETHEL

Mrs. Ole Olson has returned from the Rumford Community Hospital.

Mrs. Maggie Newton is gaining from her sickness of rheumatic fever.

Leslie Carter has moved his family to E. A. Trask's where he will be employed.

Raymond Hartlett, Eugene and Ellen Burns have started in school again after a week's vacation.

NORTH NORWAY

Not much news these days. Snow and cold weather, with the tractor and breaking roads every few days, are the principal events.

Mr. and Mrs. C. D. Morse and daughter, Mrs. Edie Heath and Mrs. and Mrs. Marion Cox attended first at the Norway Center church Wednesday, Jan. 21st. Those who entertained were Mrs. Emma Flint, Mrs. Alice Watson and Mrs. Hazel Hunt.

Ernest Watson, who is at the Hebrew sanatorium, seems to be getting along well.

Mr. and Mrs. George and Jerry Ryan of Norway tentatively have been filling some of the ice houses at the cottages around the lake. John Wyman has been helping them.

Theodore Whittemore and Edwin Austin finished cutting ice at Snow Falls.

The day was wonderful for the children who formerly lived at Auburn, and it brought back many scenes which they had nearly forgotten since living with their aunt on the farm here at South Woodstock.

Mrs. Ellis Davis (nee Olive Plueger) attended the Lecturers' Conference at Waterville, being sent as a representative of Franklin Grange, Bryant Pond. Mrs. Davis reports a very interesting Conference and much good derived from the instructions received.

Your correspondent of South Woodstock calls the attention of all grange members to the "little reading," first column, page four, in Saturday's edition of the Lewiston Daily Sun, printed Jan. 24.

School began Monday, Jan. 26, after a week's vacation and the children are again eager in their play in the school yard. The teacher, Miss Mary Hendrickson, spent several days of her vacation visiting a former classmate of Pine Tree Academy, Auburn, at East Summer. Miss Myrtle Thurlow, her teacher, also visited among school classmates during vacation.

Magalloway and Vicinity

AZISOOS GRANGE

Azisoos Grange met in regular session Saturday evening at eight o'clock. Robert Storey was in the chair. Officers pro tem: Chaplain, Clinton Bennett; Pomeroy, Addie Lancaster; Ceres, Isabelle Bryant; Flora, Eva Ripley.

Grange opened in form with 18 members present. Minutes of last meeting read and approved.

It was voted to have another Whist Party Friday night, February 6. Committee: Clinton Bennett, Isabelle Bryant.

The following committees were appointed for 1931: Degree Work—Isabelle Bryant, Addie Lancaster, Clinton Bennett; Degree Master—Clinton Bennett.

The literary program was furnished by the men. Next meeting is ladies night.

Hot dogs and rolls, doughnuts, jelly rolls and coffee were served for refreshments by Ambrose Hynes, Grange closed in form.

Rev. and Mrs. Robert Haldane and son and Mrs. Elizabeth Haldane were guests at dinner with Mr. and Mrs. Clinton Littlehale, Sunday.

Carl Littlehale is helping Charlie Lannell build pulp wood.

Lester Littlehale was in Lewiston last week.

GOOD NEWS!

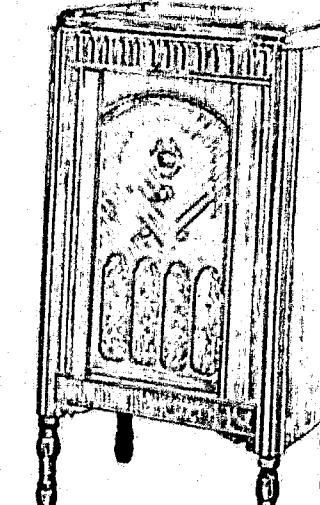

\$99.50

(Less Tubes)

for this beautiful

PHILCO
Radio-Phonograph

Here is a record-breaking value, even for Philco. A seven-tube Balanced-Unit Radio combined with an all-electric phonograph that will out-perform combinations offered at twice the money! Let us demonstrate it to you!

And now - - the 11-tube
Superheterodyne-Plus!

Everyone is talking about the wonderful new Philco Superheterodyne-Plus. Uses eleven tubes and includes many new features.

In an exquisite lowboy model. \$129.50
A real value!

Or, in the beautiful highboy \$155.00
model with doors.

Also, a radio-phonograph with
automatic record changer. \$272.00

(Above prices less tubes)

We'll extend EASY TERMS!

PHILCO

The World's Largest Selling Radio!

HOW

FROSTLIKE DEPOSITS ARE MADE BY SHELLED NUTS.—The mystery of the frostlike deposit frequently seen on the inside of glass jars containing shelled pecans, or other nuts, has been solved by E. K. Nelson and H. B. Mattern, chemists of the United States Department of Agriculture. The deposit is soap, the chemists say, and it is formed by the action of the acid fat of the nut on the alkali of the glass. It causes considerable financial loss in the sale of the product.

The chemists first thought that the acid fat of the nuts had come in contact with minute amounts of alkaline steamer left in the jars, but this theory proved incorrect.

Further investigation showed, according to the Scientific American, that shelled nuts packed in ordinary glass containers formed the white deposit, whereas nuts put up in hard glass containers at the same time and under the same conditions formed no deposit. It was concluded, therefore, that the soap was formed by the action of the fat on the glass.

The unexplained presence of the soapy deposit has long been a source of annoyance to packers of shelled nuts and to some housewives in the South who put up shelled pecans in glass jars when the nuts are plentiful and inexpensive. Although the soap does not impair the quality of the nuts, it presents an unsightly appearance and reacts against the sale of the product.

Chemistry of the Car.—If it were possible to dissect an automobile and reduce it to its original shape, it would be found that more than 100 different substances enter into its composition. With all chemicals and modern chemical research the modern automobile, although primarily mechanical in its construction, would be only a vague dream. To a marked degree the automobile makes depend especially for its refinement on chemicals. Such materials as celluloid, fuel oil, motor oil, gasoline, lubricants, paint, enamel, leather, and rayon play the essential parts in making the automobile in the efficient, beautiful products that it is.

Why Oil Tanks Corrode.—Not the least of the expenses of the oil industry, particularly in Texas, is the question of rapid corrosion of storage tanks. The corrosion is so great that in some sections of the Texas fields, it is necessary to replace one out of every five tanks each year.

The trouble lies in the high sulphur content of the crude oil, which, in the form of hydrogen sulphide, cuts comparatively rapidly into the metal.

Experiments are being conducted with various metals with sulphur re-

sistance, such as aluminum, in order to prevent the enormous waste entailed in the corroded.

Why Rainbow is Circular.—The girdle of the rainbow is supposed to be the shadow of a broken arch. This is an explanation of this common observation that the rainbow, but it fails to give a proper explanation of the circular nature of the bow. It is said that the rainbow is circular because of the fact that the drops of water are always the same whether the drop is high up or near the ground. This requires that the rainbow, as viewed by an observer, must appear circular.

Why Terms "Dog Watch."—The day on a shipboard is divided into seven watches, with enables the crew to keep them alternately; that is, the watch which starts on duty at noon sits for the next afternoon off. This is made possible by the dog watch which we make by dividing the time between 4 and 8 p.m., into two watches of two hours each, instead of the customary four.

Why Airplane "Drama."—The rate of air through the wings of an airplane is determined by the angle of the wing's sweep. This is about 10 per cent of the nose, the other 90 per cent being made by the engine and propeller.

Why Weather Affects Color.—Clouds appear lighter and deeper in color when wet because the minute droplets of water fill up the spaces between the clouds and reflect the light.

Why No Century Leaves.—Practically all English law, land leased for 100 years was considered valid. Hence the longest lease issued today is for 50 years.

Why Unlucky to Spill Salt.—The reason it is held unlucky to spill salt is that salt is the symbol of hospitality and frankness.

WHY

"White Elephant" Signifies
Something Unwanted

When you speak of your friend's worthless business, your wife's borrowing relatives, or your own unfortunate investment as "a white elephant," do you know why you do so?

The explanation goes back to an ancient and clever king of Siam who presented a white elephant to couriers whom he wished to ruin. As the white elephant was sacred, it could not be disposed of in any way, and the expense of keeping it usually proved sufficiently disastrous.

This is one of many of the strange phrases in everyday use whose origins have been traced by a writer for the Golden Book Magazine. Although they are used in their original sense today, their origins are so obscured by the years that the facts are generally unknown. Of the original stories revolved by the Golden Book writer is:

"Sub rosa." The rose—with which Cupid bribed fairies to keep secret the amours of Venus—became the emblem of silence during the Middle Ages. It was pictured at the ceilings of council rooms, banquet halls and over confessional booths. Hence sub rosa—under the rose.

Why Word "Budget" Has Connection With Taxes

We can only trace the word "budget" back to the Latin "bulga"; but it is believed that this was itself an adaptation of a word from the Celtic language of old Gaul. It meant a leather bag; and from it we have the old English "bouge," "a bag," and "budget," "a little bag," which was in slang used to mean something like "a bag of tricks." In 1733 a pamphlet on Sir Robert Walpole's forthcoming ex-

ile bill was published entitled "The Budget Opened," the phrase being as equivalent to "the cat out of the bag."

Henceforth a chancellor of the exchequer making his statement of proposed taxes was said to "open his budget"; and soon the word "budget" was used without jocular intent of the statement itself.

Why Pollen Needs Crossing

The blossoms of every variety of apple are nearly if not quite infertile with their own pollen. They need to be crossed. This is one of the startling announcements which has far-reaching importance to all those who are growing fruit of any kind, either in the doorway or in orchard.

Fruit blossoms are sterile because most varieties are hybrid in nature and carry a mixed inheritance because of many forms entering in their makeup. In nature most hybrids are infertile, although they grow wonderfully well.

Bees are not active in transferring pollen from one variety to another except when the weather is very favorable, such as a high temperature and bright sun. But they will work all day in good weather. Bad weather at blossoming time usually results in a light crop of fruit.

Why Oil Tanks Corrode

Not the least of the expenses of the oil industry, particularly in Texas, is the question of rapid corrosion of storage tanks. The corrosion is so great that in some sections of the Texas fields, it is necessary to replace one out of every five tanks each year.

The trouble lies in the high sulphur content of the crude oil, which, in the form of hydrogen sulphide, cuts comparatively rapidly into the metal.

Experiments are being conducted with various metals with sulphur resistance, such as aluminum, in order to prevent the enormous waste entailed in the corroded.

Why Rainbow is Circular

The girdle of the rainbow is supposed to be the shadow of a broken arch. This is an explanation of this common observation that the rainbow, but it fails to give a proper explanation of the circular nature of the bow. It is said that the rainbow is circular because of the fact that the drops of water are always the same whether the drop is high up or near the ground. This requires that the rainbow, as viewed by an observer, must appear circular.

Why Terms "Dog Watch"

The day on a shipboard is divided into seven watches, with enables the crew to keep them alternately; that is, the watch which starts on duty at noon sits for the next afternoon off. This is made possible by the dog watch which we make by dividing the time between 4 and 8 p.m., into two watches of two hours each, instead of the customary four.

Why Airplane "Drama"

The rate of air through the wings of an airplane is determined by the angle of the wing's sweep. This is about 10 per cent of the nose, the other 90 per cent being made by the engine and propeller.

Why Weather Affects Color

Clouds appear lighter and deeper in color when wet because the minute droplets of water fill up the spaces between the clouds and reflect the light.

Why No Century Leaves

Practically all English law, land leased for 100 years was considered valid. Hence the longest lease issued today is for 50 years.

Why Unlucky to Spill Salt

The reason it is held unlucky to spill salt is that salt is the symbol of hospitality and frankness.

"Bear Flag" Symbol of Republic of California

In the early days California was isolated from the other Spanish possessions in America by mountains, deserts and poor communications—and after Mexico won independence this region became even less answerable to central authority. It enjoyed practical autonomy while the rest of Mexico was engaged in internal strife. Americans and other non-Mexicans settled in California and assumed importance in its affairs. After 1840 it became apparent that California would not remain much longer under even the nominal authority of Mexico, but the new landholders were divided in opinion as to what the future status of the country should be. Some favored annexation to the United States; others advocated a British protectorate. During this period of hesitation, war broke out between the United States and Mexico over Texas, the former Mexican state which had become an independent republic and then annexed itself to the United States. Col. John C. Fremont took advantage of the situation, seized Sonoma, and on July 4, 1846, proclaimed California a republic. The banner of the new republic bore a bear, and this was the Bear flag that Fremont hoisted.

Among those besides Fremont whose efforts specifically effected the conquest of this region were Stockton and Kearny, and on August 15, 1846, the republic of California was annexed to the United States.

Little Damage Done by Missile, as It Happened

Mark Twain, at a publishers' dinner in New York, talked of his reporting days in Virginia City.

"We were trying a horse thief one day," he said, "and all of us rode the big, hairy sonndomed pulled off his boot and threw it at the judge. It was a heavy boot, too. It was studded with hobnails . . . I am still rather proud of the way I wrote up that little incident, doing it neatly, and at the same time getting back on a rival reporter whom I disliked. I got it all in one paragraph—something like this:

"Suddenly the blackguard thief, pulling off his boot, hurled it at all his might straight at the judge's head. This desperate act might have been attended with most disastrous consequences, but, fortunately, the missile struck a reporter, so that no harm was done!"—Pathfinder Magazine.

Heart All-Important in Racial Distinctions

That the Egyptians had any kind of the circulation of the blood or of the real duties of the heart seems in probability, but they did conceive this organ to be the seat of life and consciousness and the blood to be intimately related thereto. Thence came into men's minds all the complicated lore of purity of blood, of "bad blood" between rivals, of "heartful" sincerity, and so on, which have dominated the thoughts and the literature of races of whom Egyptians never dreamed. The brain, curiously enough, Egyptian doctors seemed never to have considered of the slightest importance, and heroes of literature when vowing devotion still press their hands on hearts instead of heads.

Origin of "Chaufer"

The word chaufer originated from the activities of beggars who, during the war between the Vendees and the Republicans of France in 1793, pillaged and fired the countryside. They were so called specifically because they burned the feet of their victims to make them reveal the hiding places of their valuables.

Their chief leader was one named Schinderhannes, or "Jean l'Orne leur." The word chaufer, from which chaufer is derived, was drawn from the Latin calidare, which means "to make hot"—Latin facio, mafe, and calor, heat.—Literary Digest.

Why It's Popular

"The great popular success of psycho-analysis" is the late Bishop John Gardner Murray said one day in Baltimore, "is due to this fact. Psycho-analysis, as it is interpreted to us, tells us that the things we want to do are the things we ought to do. A very attractive creed."

"Psycho-analysis reminds me of the schoolboy who had to define liberty of conscience. His definition was:

"Liberty of conscience means doing wrong and not worrying about it afterwards."

Trained

Robertta was telling her teacher about her mother's birthday.

"How old was your mother?" inquired the teacher.

"Oh, she is always twenty-five on her birthday," replied the well-trained seven-year-old.

Six Weeks More

Victory Made History

on Plain of Marathon

The ancient Marathon was a small town on the eastern coast of Attica, about 20 miles northeast of Athens. There is a modern village of the name, but the site of the ancient Marathon is occupied now by a town called Vrana. Along with neighboring towns, the old Marathon belonged to an ancient Hellenic league called the Tetrarchs. This league claimed a very early origin, legend carrying it back to the time of Theseus, and it survived until after the Fourth century B. C.

The plain of Marathon is famous as the scene of the decisive battle in which Miltiades led the Athenians and Plateans to victory over the army of Darius under command of Datis and Artaphernes in B. C. 490. The Greeks numbered about 10,000, while the Persians had a much larger force. But the invaders were put utterly to rout with heavy loss, while the Greeks lost only 120 men. The great mound in which the remains of these dead were placed is still conspicuous on the plain. The battle turned back the eastern invasion of Europe and saved Athens; and, according to tradition, a Greek runner sped without stopping from Marathon to Athens bearing the tidings of victory.

Ancient Wooden Locks Burden for Strong Man

The most common lock now in use on exterior doors of buildings is the cylinder lock developed by Linus Yale, Jr., and this leads us back into history. Primitive prototypes of Yale's invention were in use in Mesopotamia and Egypt as early as 2000 B. C. These were huge wooden latches requiring cumbersome keys, as we may gather from the Biblical passage (Isaiah 22:22) "And the key to the house of David will I lay upon his shoulder." This key, or mutual as it was and still is called in the East, is a stick of wood from 15 to 30 inches long, 2 to 4 inches broad and 1 to 2 inches thick. Into the face of one end are set a number of wooden or iron pegs about an inch long. These pegs correspond with as many holes in the wooden bar or bolt which locks the door and can only be lifted when these pegs enter the holes and lift a corresponding series of pins which drop home by force of gravity and keep the bar locked until pressed up by the key with its pegs. Such huge keys opened the way into the mighty palaces of Nineveh and Persepolis and admitted to "hundred-gated" Thebes. Today in miniature and more refined fashion, the small key that enters the cylinder lock pushes up the little brass pins inside and permits the opening of the door.—Detroit Free Press.

Gas Pressure Used to Stimulate Flow of Oil

In the operation of oil wells a period usually develops when the well is not good enough, and yet is too good. When it has reached a point where the natural flow is too weak through lack of pressure below the ground to produce oil at an efficient rate, a period of real worry is encountered.

Ordinarily, while the flow is too light, it is still too strong to permit the employment of pumps of the plunger type. It is at this time that a new method is being attempted, the gas-lift method, of bringing the oil up. Some success has been attained in forcing gas under pressure down into the ground either through a concentric or parallel pipe. The pressure of the gas, simulating the natural gas pressure, throws the oil up with something like the original vigor. The method in question, however, is still far from perfected, as almost every well presents a problem of its own and no standard can be set for the operation of a gas-lift device.

Old, to Be Young

Herbert had just come in before school time with a rip in his overcoat, but Mum kept him home long enough to mend it. At noon he went back to school, but returned quickly with a note from his teacher which read: "I've sent Herbert home because he has a sore throat."

"Why, Herbie, nothing was wrong with your throat, I hope," his mother exclaimed. "Tell mamma what you said to your teacher." To which Herbert replied: "I told her my tote was sore."

—Brooklyn Eagle.

Curious

Two poultry men were discussing their egg production in the presence of a small lad. As the lad and his father were nearing home the lad said:

"I want to see the 50 per cent things our hens have been laying."

McJern Kitchen "Slavey"

The apiced figure at the end faced really at the manipulation of plates and dishes, pots and pans. Was this all that marriage meant?

A heavy sickle, a rolling up of sleeves, and the kitchen was soon filled with the clatter of washing and scouring.

The toiler ceased from time to time to listen to the steady thrash of a typewriter in the next room.

Suddenly the lad relaxed, and a large, spectacled woman, lofty of brow, appeared in the doorway.

"Hercules, darling," she said, addressing the little man, "I never can remember—do you spell weave man with or without a hyphen?"—London Tat-Tat.

Polly and Her Pearls

By ELIZABETH BARTON

(Copyright)

POLLY would not have gone to the dance at all if she had her own way about it, but Tommy talked her into it.

"I have nothing to wear among such swarthy people," said Polly.

"Make something out of that soft pillow," advised Tommy, "and you'll look a thousand times better than the average."

And as a matter of fact there was not a more beautiful girl at the great ball than Polly in her wisp of evening gown that she had fashioned her gray slippers and stockings to match, and the whole topped as Tommy put it by the curly riot of curls.

"That old string of beads could be a priceless lot of pearls for all anyone here might know," he told her as they danced.

"And if they were real," retorted Polly, "I would not be here seeking patrons for my art shop—I could have such a gorgeous shop that people would come in spite of themselves." She toyed gracefully with the long string of beads in question. "Oh, dear! Isn't that the limit—right in the middle of the bathroom?" she exclaimed, and a brilliant blush sprang swiftly to her cheeks. This string had broken and the beads were rolling everywhere at once.

Of course, she was the center of attention, and all the dancers stopped to help rescue what they supposed to be pearls.

"Please don't bother," said Polly, "they are only beads."

Nevertheless they were nearly all restored to her and she put them carefully into her small vanity bag.

A young man, however, sitting watching the affair had picked up a few of the beads and having overheard Polly's remark about their value, looked carefully at them.

"Humph! I think I'll show these to Caruthers—look like the real thing to me. Perhaps I can do the young lady a good turn. Rather fancy her anyway," he mused, by much inquiry, to find out who Polly was and that she had a web shop where she sold lamp shades, cushions and other such trifles.

And as Polly and Tommy strolled up Park Avenue to the tiny place that was Polly's home, Tommy wished with all his heart that he was anything but an impetuous artist who dared not tell the only girl how much he loved her. He had been quite ashamed to give her the old string of beads on the occasion of her birthday some few years back, but it was all he had in his scant possessions.

When Polly said good-night she apologized softly for having caused such a scene at the dance.

"I didn't want to let that crowd know how much I valued every one of those beads, Tommy, but I think we found most of them." She gave him an extra warm squeeze and slipped swiftly up the stairs. "Come early Sunday afternoon," she called back to him.

Sunday was the happiest day of the week, for Polly, tired of her own cooking, let Tommy get her tea and supper Sunday night.

And on Sunday evening while Polly was idly running through some music and Tommy was making something delicious in the kitchen, some one knocked at the front door. Polly hastened to see who it might be and whether her new evening with Tommy was to be shared with a third person.

That third person happened to be the young man who had picked up three of the beads from Polly's string. After telling her his mission he was promptly invited in.

And when Polly told him that she had a string of them that would go three times around her neck the young man gasped.

"My dear young lady," he exhaled, "if all those beads are of the value of the three I picked up you have a set of pearls worth at least fifty thousand dollars."

"Tommy, Tommy," she shouted, "come quickly. I'm going to faint!" And when Tommy rushed from the kitchen with a pair of steaming peacock blankets in his hand she stood up braced her shoulders and decided not to faint. "No I won't," she said and turned to the strange young man. "Tell Mr. Waterford what you have just said."

Tommy had all he could do to keep the steaming Sunday night supper from greasing the studio floor.

"They've been in the Waterford family for ages—I don't think their value was ever suspected," he said easily.

"My pal says that is only a rough estimate—they may be worth double that amount."

"In that case I shall most certainly faint," laughed Polly, and invited the strange young man to stay for supper.

But something in the eyes of these two artists prevented him from accepting. The fire and hope and longing there were not to be intruded upon. He left them to their happiness.

Kingdoms of the Past

Arnon and Jabbok are important points in the history of Israel. They mark the boundaries of two once mighty kingdoms whose monarchs "Sihon, king of the Amorites, and the king of Bashan," were overcome by the hand of wanderers from the land of Egypt, who were on their way to take possession of the land promised to their forefathers, which was to extend from the sea to the "great river" the Euphrates.

Found There Was Limit to Customers' Patience

At the time of the rush into the Palmer gold field, in northern Queensland, Australia, Justice was rough but fair, observes The Dunedin (N. Z.) Star, in quoting an incident of the day.

The one storekeeper there, when stocking, took up a barrel of horse-shoe nails, thinking that they would readily sell to diggers who, in loading their pack horses, eliminated the last ounce of weight that was not edible. As it chanced, however, there was no demand for the nails. Every man who had a horse carried a few in his pocket. After the nails had been on my hands for a while he struck the brilliant idea that he would force sales by refusing to sell any flour or sugar or rice unless the buyer also purchased an equal weight of nails.

For a time the men grumbled, but bought and, not needing the nails, put them back in the barrel, so that they became to the storekeeper what the curse was to the widow. Eventually the swindler got wind and a big rumpus ensued. About a hundred diggers assembled and took charge of the store. They weighed the nails, paid full price, flushed them into the creek, and on a signboard made of easement wood they notified all and sundry: "No more nails."

Rich Level Tracts in the Scottish Highlands

The region known to the world as the Highlands of Scotland has no political or civil boundary. Separated by only a vague line of demarcation from the division called the Lowlands,

the Scottish Highlands may be briefly described as that portion of the north and northwest of Scotland in which the Celtic language and manners have less or more lingered until modern times. The "Highlands," as it is usually called, extends diagonally across Scotland from Nairn on the Moray Firth to Dumbarton on the Clyde; but the mountainous part of the county of Banff, Moray, Aberdeen, Kincardine and Perth are also understood to be included in the designation "Highlands." Caithness might be excluded as being a generally level country; but throughout the Highlands there are rich level tracts, none being more so than the eastern division of Ross-shire. The Hebrides or Western Isles are included in the Highlands, but the Isles of Orkney and Shetland, though to the north, are distinctly excluded, by reason of the Norse origin of their inhabitants.

Forty Centuries Ago

One-way traffic was in use nearly 4,000 years ago in the Neolithic, or Stone Age, camp on the famous Trundle hill overlooking Goodwood race course, in Sussex, England. Dr. Cecil Curwen, the archeologist, who has been conducting excavations on the site, states, "It is certain that one way into the camp was used only as an entrance and the other as an exit. These camps are extremely rare; there are only a dozen in the whole of England; the date of this camp is approximately 2000 B. C. The most interesting Neolithic find was that of a large semi-circular block of stone with a hole being worked up into a ridge with sharp flint marks radiating from it; possibly an early method of making fire."

Charleston "Sugar House"

The old Sugar house at Charleston, S. C., was the name given to the workhouse, a place of detention for fugitive slaves and the punishment of slaves and free negroes. It was here that the lashes were applied, and hence the name Sugar house.

On Sunday was the happiest day of the week, for Polly, tired of her own cooking, let Tommy get her tea and supper Sunday night.

And on Sunday evening while Polly was idly running through some music and Tommy was making something delicious in the kitchen, some one knocked at the front door. Polly hastened to see who it might be and whether her new evening with Tommy was to be shared with a third person.

That third person happened to be the young man who had picked up three of the beads from Polly's string.

After telling her his mission he was promptly invited in.

And when Polly told him that she had a string of them that would go three times around her neck the young man gasped.

"My dear young lady," he exhaled, "if all those beads are of the value of the three I picked up you have a set of pearls worth at least fifty thousand dollars."

"Tommy, Tommy," she shouted, "come quickly. I'm going to faint!" And when Tommy rushed from the kitchen with a pair of steaming peacock blankets in his hand she stood up braced her shoulders and decided not to faint. "No I won't," she said and turned to the strange young man. "Tell Mr. Waterford what you have just said."

Tommy had all he could do to keep the steaming Sunday night supper from greasing the studio floor.

"They've been in the Waterford family for ages—I don't think their value was ever suspected," he said easily.

"My pal says that is only a rough estimate—they may be worth double that amount."

"In that case I shall most certainly faint," laughed Polly, and invited the strange young man to stay for supper.

But something in the eyes of these two artists prevented him from accepting. The fire and hope and longing there were not to be intruded upon. He left them to their happiness.

Kingdoms of the Past

Arnon and Jabbok are important points in the history of Israel. They mark the boundaries of two once mighty kingdoms whose monarchs "Sihon, king of the Amorites, and the king of Bashan," were overcome by the hand of wanderers from the land of Egypt, who were on their way to take possession of the land promised to their forefathers, which was to extend from the sea to the "great river" the Euphrates.

NOTICE OF LOST BANK BOOK

Notice is hereby given that the Bethel Savings Bank has been notified that book of deposit issued by said bank to Mrs. Lillian M. McGinley and numbered 1417 has been destroyed or lost, and that she desires to have a new book of deposit issued to her.

BETHEL SAVINGS BANK,
By A. E. Herrick, Treas.,
Bethel, Maine.

NOTICE OF LOST BANK BOOK

Notice is hereby given that the Bethel Savings Bank has been notified that book of deposit issued by said bank to Mrs. Nedra Littlehale and numbered 1412 has been destroyed or lost, and it is desired that a new book of deposit be issued to her.

BETHEL SAVINGS BANK,
By A. E. Herrick, Treas.,
Bethel, Maine.

NOTICE OF FORECLOSURE

Whereas Herbert H. Morton and Daisy B. Morton, both of Newry, County of Oxford, State of Maine, by their marriage dated November 2, 1920, and recorded in the Registry of Deeds for County of Oxford, Book 382, Page 179, conveyed to L. W. Ramsell Company, a corporation organized and existing under the laws of said State of Maine, and located at Bethel, in said County of Oxford, a certain parcel of land situated in said Newry, with the buildings thereon standing, bounded and described as follows, viz:

On the north by land of Pearl Kilgore, formerly the land of Herbert O. Chapman; on the east by land formerly of Ralph W. Kilgore, on the south by land of Charles C. Bennett, formerly; and on the west by Bear River, as called.

Also a certain other lot or parcel of land being formerly the Edmund P. Chapman Fifty acre lot, as called, and being one-half of the hundred acre lot purchased by said Chapman half being conveyed to Bearon Foster, and being the southerly half of lot numbered six in the seventh range of lots in said Newry, or that part of Newry which was formerly Andover West Surplus.

And whereas the condition of said mortgage has been broken; Now, therefore, by reason of the breach of the condition thereof said undersigned corporation claims a foreclosure of said mortgage.

Dated at Bethel, Maine,

This 20th day of January, 1931.

L. W. RAMSELL COMPANY

By Llewellyn W. Ramsell,
its treasurer thereunto duly authorized.

State of Maine.

County of Oxford ss.

January 20th, 1931.

Subscribed and sworn to as true
by said Llewellyn W. Ramsell, Treasurer
as aforesaid, before me

ELLERY C. PARK,
42 Justice of the Peace.

NOTICE

The subscriber hereby gives notice that she has been duly appointed administratrix of the estate of George W. Harden, late of Bethel in the County of Oxford, deceased, and given bonds as the law directs. All persons having demands against the estate of said deceased are desired to present the same for settlement, and all indebted thereto are requested to make payment immediately.

BESSIE L. MARTYN,
Jan. 22, 1931. Bethel, Maine. 41p.

NOTICE

The subscriber hereby gives notice that he has been duly appointed administrator of the estate of Imogene M. Browne, late of Bethel in the County of Oxford, deceased, and given bonds as the law directs. Harden, late of Bethel in the County of Oxford, deceased, and given bonds as the law directs. All persons having demands against the estate of said deceased are desired to present the same for settlement, and all indebted thereto are requested to make payment immediately.</p

Claire's Highest Dream Comes True

By DOROTHY DOUGLAS

(Copyright)
KIRKWOOD was patiently shaving when his eyes suddenly found far greater occupation than looking at his lather-covered face.

Reflected in his small shaving mirror from some nearby apartment was a head and shoulders of a girl. But a girl! Hair like a cloud of sun, eyes wide and intelligent—Kirkwood couldn't see the color—and aroat that assuredly eclipsed that of mine Laurie. And she was doing most miraculous things with clay and long sensitive fingers. For out of an inert mass of dull green clay she had brought to life two exquisite children's heads.

Not feeling that it was quite the thing to gaze secretly at any young girl in the sanctity of her own home, Kirkwood heaved a sigh and turned away from the mirror. The face was never deeply etched in his brain.

He didn't know just why his Uncle's personality kept haunting him day. That august person was always purchasing this or that art treasures and the figures on the checks ran from four to six figures. At present was giving a great prize to the child of art—the Wadsworth Competition—and the lucky winner was to richer by five thousand dollars.

Kirkwood himself knew no more art than his uncle knew of the breeding of day-old chicks, but for some reason he felt that the girl seated in his shaving mirror was a genius in embryo. His uncle and the kept affection in his mind.

Then later came the great inspiration.

"She must be made to enter competition! But how?" Kirkwood racked his brain, and it was not until he reached home again that night saw the juxtaposition of his own dow and the small slanting sky-light window in hers that the idea hit him.

Any one watching Kirkwood would easily have thought him mad. Perhaps he was. Love is a bit mad at times. He first detached the mouthpiece from the speaking tube at his brazier, then from his bathroom secured a long bit of rubber tubing that served as part of his shower arrangements. He put the mouthpiece to the tube and silently slipped out on the narrow coping outside his window. The Fates were truly lending a very helpful hand this affair, for a tiny ventilating pipe was left open in the girl's window. Against this Kirkwood secured mouthpiece, then carried the tube back to his room.

Then Claire Coventry switched off golden light and slipped into her bed. She was deep in plans for the night.

She was dreaming that she was spellbound at the beauties of earth when out of that spirit world she heard a sepulchral saying, "Enter Wadsworth Competition—Enter Wadsworth Competition."

There was a sound of feet running out of bed in a dashed lightning and switched on the lights there was not a soul in the room! She had been dreaming or was this an unseen presence trying to her?

Had not for a moment occurred to her that her work was promising enough to send to the great competition, now with that message ringing in her brain, she knew she must

get up and get dressed. She had not for a moment occurred to her that her work was promising enough to send to the great competition, now with that message ringing in her brain, she knew she must

get up and get dressed. She had not for a moment occurred to her that her work was promising enough to send to the great competition, now with that message ringing in her brain, she knew she must

get up and get dressed. She had not for a moment occurred to her that her work was promising enough to send to the great competition, now with that message ringing in her brain, she knew she must

get up and get dressed. She had not for a moment occurred to her that her work was promising enough to send to the great competition, now with that message ringing in her brain, she knew she must

get up and get dressed. She had not for a moment occurred to her that her work was promising enough to send to the great competition, now with that message ringing in her brain, she knew she must

HOW

PHRASES IN COMMON USE HAD THEIR BEGINNING.—"Turncoat."—An ancient duke whose domain lay between France and Saxony designed for himself a reversible coat. When he wished to be thought an ardent Frenchman, he turned the white side out; when he sought favor with the Saxons, he wore the blue.

"Forlorn hope."—The origin of this phrase was not in the words "forlorn" and "hope," but an anglicization of the Dutch phrase "verloren hoop," meaning "the lost troop," or a body of men sent out to begin an attack.

"A-1."—This symbol of perfection comes from the rating of ships by the famous Lloyd's register of shipping. A-1 means a first rate hull and fittings. A-2 means first rate hull, but second rate fittings, and so on.

"Quiz."—This word, now meaning "to question" or "an examination" had no original meaning, whatsoever. In 1780 a Dublin theatrical manager named Dilley had that he could introduce a word without meaning into the language within 24 hours. Overnight he had the four mystic letters on every available wall. Within a day all Dublin was using the word and puzzling over its origin.

"Let the cat out of the bag." It was once a trick among country folks to substitute a cat for a suckling pig and bring it to market in a bag. If a greenhorn chose to buy a "pig in a poke" without examination, it was very well for the seller, but if he opened the bag the trick was disclosed.—Golden Book Magazine.

HOW MUCH DO YOU KNOW QUESTIONS

1. Who wrote "The Elegy in the Country Churchyard"?
2. Of what nationality was the inventor of the printing block?
3. What university developed from John D. Scopis' evolution trial?

 9. Piano, organ, violin, harp, banjo, guitar, viol, lyre, zither.
 10. John Tyler Page.
 11. Fidelio?
 12. "Papa" Joffre.

WEST PARIS

Mrs. and Mrs. Stanley I. Perham were given a reception and shower at the home of Mr. Perham's parents, Mr. and Mrs. Alfred Perham, Church Street, Monday evening. A large company was present and the bountiful number of gifts, both useful and valuable represented the good wishes of nearly all of the community. After viewing the gifts and congratulations and good wishes to the young couple, delicious refreshments were served.

Mr. and Mrs. Frank P. Knight, Jr., were in Portland Monday.

Mrs. M. E. Kendall returned to Bethel Monday morning. Mrs. Kendall attended State Grange Lecturer's Conference at Waterville last week and visited her sister and husband, Rev. and Mrs. N. R. Pearson, at Oakland.

Miss Isabel Pease of Portland was the guest last week of Mr. and Mrs. Frank P. Knight, Jr.

Mr. and Mrs. Vernal W. Bates of New Haven have been recent guests of Miss Ruth Tucker.

Mrs. Florence Thayer, who has been working at S. J. Calfee's for several months, ill from high blood pressure, at the home of her sister, Mrs. P. G. May, etc.

The Senior Y. P. C. U. entertained on Saturday 20 members of the Norway Y. P. C. U. Sunday evening, at the Universalist Church.

Mrs. F. B. Palmer, Mrs. E. E. Harrington and Mrs. E. L. Harrington were hostesses at the Friends' Club party at noon, Will Hall Thursday afternoon. The group of local company, who enjoyed a social entertainment which the girls presented. A pony luncheon was served.

The Women's Library Club will meet with Miss Ruth Tucker Friday afternoon.

Miss J. Martin was home for the week and from the Maine Central Institute returning to Pittsfield Sunday.

Miss Edna Harrington is spending a week at the vacation home of her mother in Portland and Boston.

Middle Intervale, Bethel

The ladies of the Middle Intervale Farm Bureau met with Mrs. Robert Stevens Jan. 22. Many dishes and refreshments and balanced meals were taken up and made a most interesting time.

What's Sunday.

There were twenty-four at the church service of First Park St., last Sunday, and Mrs. Harry Harrington, who was there.

What's Sunday.

It's a severe storm and wind blowing.

The snow plow busy most of the time.

Mr. Bishop is spending a few days with Mrs. Roland Anna.

Middle Intervale School

Those who received 100% in Arithmetic for the week ending Jan. 23 are:

John Davis, Adel Cotton, Raymond Lester, Lester Hart, Helen Steiner and Annie Winslow.

Those who received 100% in Spelling are Harry Santora and Paul C. F.

Emerson High School

Danger in Elegance

There is no intent so pernicious as that in those who have it not in their power to effect women, who are so ill

effected by nature in this particular, ought to study the rules of eloquence.—Addison.

TWO-MINUTE SERMON

by REV. GEORGE HENRY

THE GROUCH

He goes about with his brow drawn down, his shoulders hunched up. He gives you a surly grunt if you cheerfully greet him. For the most part he sits at home and complains because other people don't move as fast as they should. When he ventures forth it is too hot or cold or wet or dry for his comfort. His income is never large enough to suit him, but everyone else is getting too much. When he sells his orders from Sears Roebuck, His words are pearls of wisdom and your opinion is mere driveling. Taxes are too high but we should have more improvements. The other fellow should foot the bill. He wishes that he had settled in some other town when he quit the farm, and so does every other man who knows him. Don't be a grouch. Cheer up, or shut up.

In scene two the curtain rose on a cozy, papered living room with easy chair, floor lamps, a library table with lamp and books; pictures and vases of flowers on the walls; lovely portieres and window draperies and a couch with gay pillows. Mrs. Holt called Ernest Moore, chief builder of scenery, and Ray Bennett, able assistant and painter, to give Mrs. Young the cost figures, etc. A total of \$41.00 for lumber, mill work, hardware and paint was given, at which Mrs. Young nearly fainted, but Mrs. Holt allowed that the sum spent for scenery to help rent the hall was as necessary as sums spent sending officer to State meetings to keep the Grange in the public eye. Mr. Moore avowed that the committee, after building the scenery, will work up shows to pay the bills. Ray Bennett, who is still in his painting togs, is fishing in the gold fish bowl and allows the committee may all wish they were fishing when the Grange sees what they've gone ahead and done—but Norah, who is dusting the rooms, says, "Why argue? Let's all just stand in a row and say to the Grange, 'Here's yer new scenery, ain't it grand!'" Now we'll pay for it soon if ye'll all work to heat the hand."

The curtain then fell amid great applause and a unanimous vote of acceptance and thanks was given the committee for their week's labor.

Fernald's Mill, Albany

Mr. and Mrs. Everett Dunham from Florida called on his cousins, Mr. and Mrs. Harlan Bumpus, and uncle, Wallace Cummings, one day last week.

Theodore Brown and Will McAllister Jr. spent Sunday at Ingalls McAllister's.

The Town House school closed the 22d for the winter.

Miss Myrtle Lapham was an overnight guest at Carrie Logan's one night last week.

Elmer Saunders visited his brother Carlton and family at West Bethel recently.

Mrs. Ernest Brown was in this vicinity on business Monday.

Mr. and Mrs. Will McAllister were in Fryeburg Sunday.

NEWRY

Carl Hyakala is trying to find some team to haul logs to the mill as his team cannot haul as fast as Mr. Campbell's.

Charlie Tuell of Bethel is hauling squares to Bethel with his big truck.

There was a whist party at the Grange Hall last Friday evening.

We are having some quite cold weather.

Carlson for a few days last Sunday.

morning the mercury registered ten below zero and yet we have seen large flocks of crows who seemed very cheerful. It is hoped they will find plenty to eat so they can stay all winter.

Rev. Norman Davis was in town last week making some calls. He makes his home while here at S. P. Davis.

Mrs. Duncan McPherson was in Hanover last Friday afternoon.

TOMORROW'S**SATISFACTION**

No one has ever been a success who did not save part of what he earned.

SINCE money is made both to spend and to save, how many treat the rule fairly?

SOME spend all; others plan on saving 10 per cent of their income; others do even better than that.

Your money here in an interest account is kept working for you persistently and faithfully.

DON'T SPEND IT ALL**Bethel Savings Bank**

BETHEL, MAINE

Why Is It?

A man wakes up in the morning after sleeping under an advertised blanket on an advertised mattress and pulls

off advertised pajamas; takes a bath in an advertised tub;

shaves with an advertised razor; washes with advertised

soap; powders his face with advertised powder; dons ad-

vertised underwear, hose, shirt, collar, shoes, suit, hand

kerchief; sits down to a breakfast of advertised cereal;

drinks a cup of advertised coffee; puts on an advertised

hat; lights an advertised cigar; rides to his office in an

advertised auto on advertised tires; then he refuses to

advertise on the ground that advertising does not pay?

If your business isn't good enough to advertise, advertise

it for sale?

Ice Plane Racing Is Newest Winter Sport

In Worcester, Mass., 14 enterprising young men have constructed what they call ice planes, and their races are affording a lot of sport and excitement. The planes are equipped with runners and are powered with motor cycle engines which drive the propellers. They are streamlined in airplane fashion, but minus wings and are built in all shapes and sizes in line with the construction principles of the builder.

WEST BETHEL

Miss Helen Horst of West Paris
spent the week end with Miss Laura
Hotchkiss.

Miss Mabel Sweet of Errol, N. H.,
visiting Mrs. Laurence Lord.

Elvina Bennett, who has been con-
fined to her home the past week, is
due to be out.

Nathaniel Bone was called to Biddeford
ville on Sunday on account of the ac-
tions of Mrs. Bean, who is spend-
ing the winter with her daughter, Mrs.
Elva Maun.

Mr. and Mrs. Hollis Hutchinson of
Bethel were Sunday guests of Archie
Hutchinson and family.

Mrs. Adl. Mills of Gorham, N. H.,
spent the week end with Ervin Hutch-
inson and family.

Kenneth McLean and Carlton Sam-
mons have work at the N. H. Stowell
Company's mill at Bethel.

Mr. and Mrs. Bernard Rolfe have
moved into the Bertie Briggs house on
the Flat road.

Mr. Almon Tyler and son Warren
spent the week end in Portland as
guests of her sister, Miss Hetta Shaw.

Mrs. Estella Headridge spent Tues-
day with her sister, Mrs. Frank Hol-
loman, at Bethel.

Fore Street, Oxford

Mrs. Hattie Davis of South Paris
spent Tuesday the 20th with Mrs. E.
E. Twitchell.

Mrs. Laurence Brown took supper
with Mrs. Philip Nobel in Norway the
other night.

Miss George Mattson was a very
busy girl last week. Mr. Littlefield
had an interesting job. He is better
at his writing.

At the station and in H. H. Hinman
she is doing the work from A. D.
Hinman's 100 p. m.

Margaret Cummings is in H. H. Hinman's
house for cousin and wife were at their
home over Sunday. This winter
she is living in Norway.

The Howard Swan and daughter Het-
ta of South Paris spent Friday with
Mrs. Hinman.

J. E. Twitchell and Albert Twitchell
spent the Bethel Hill Friday with a load
of feed. They found good roads but
not enough for fruit.

Leon Twitchell just shipped a large
bulk to Penley of Auburn.

Laurence Brown, who works in East
Bethel, was home over the week end.

Talk about climate! Why, I should
say we have that, even here in Maine.

Only last Saturday the thermometer
hovered around zero all day, but days
like that make one glad they are liv-
ing, and in the good old State of Maine,

the best State in the Union.
